EXPLORING OCEAN VI

The project Ocean VI is a luxurious complex offering four apartments and two penthouses of high-living standard. All residential units are three-bed roomed. Focus was placed on the living area, kitchen and dining area, brightly overlooks and sumptuous views of the balcony. The essence of the indoors blends gently with the exterior beauties.

The ground floor apartments have a partial view of the ocean through the balcony. The apartments on the first floor and the two penthouses on tops have a direct balcony access that oversees the ocean.

The penthouses have each access to their private roof-top. The architectural design has a main entrance on ground floor with parking for all habitants and a private elevator from ground to all apartments.

THE FLOWING INTERIOR SPACES

The large openings and private balconies invite the ocean views into the apartments while the expansive indoor open-floors offer a wonderful sense of space to revel in.

The building's structure allows in natural sunlight and cross-ventilation in the residences through the large aluminium openings, thus taking advantage of nature's forces to minimise the ecological footprints of the residents.
